

MAKING INVISIBLE INK!

LEMON JUICE

Squeeze a lemon into a small bowl. You can use lemon juice in a bottle too!

Dip a cotton swab or small paint brush in the lemon juice.

Write your message on a white piece of paper and let it dry.

With an adult's help iron the paper until your message appears!

How does this work?
Lemon Juice is an acid, which destroys some of the paper so when heated that's the part that turns brown first.

BAKING SODA

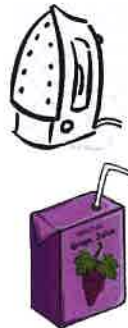

Mix equal parts baking soda & water into a small bowl.

Dip a cotton swab or small paint brush in the baking soda mixture.

Write your message on a white piece of paper and let it dry.

With an adult's help iron the paper until your message appears! **OR** paint over the paper with purple grape juice.

How does this work?
The baking soda destroys some of the paper, then the juice reacts to PH when combined with the baking soda.

CORNSTARCH

Heat 2 TBSP corn starch with 1 TBSP water until dissolved.

Dip a cotton swab or small paint brush in the corn starch mixture once cooled.

Write your message on a white piece of paper and let it dry.

Mix 1 tsp iodine with 10 tsps water. Using this mixture paint over the paper to reveal your message!

How does this work?
The iodine binds with to the starch molecules to reveal your message!
