A Thriving Community

Statistics show that a vibrant library system is an important factor in strengthening community vitality and resilience.

Having three unique communities within our Township enables us to develop innovative programs to service the diverse year-round and seasonal patrons who live, work and play here.

Our goal is to embrace technology while meeting the needs of our committees. All three branches are staffed with knowledgeable, friendly employees who continue to provide assistance and information in a welcoming and friendly manner.

2020 Highlights

The library has faced a few challenges this year due to the pandemic. Like all businesses, we had to adapt how we operated.

We were able to offer curbside service for our patrons during 2020. From August until December we were able to open to the public while adhering to COVID-19 regulations and safety procedures.

The Honey Harbour Public Library moved to a new location. It is now across the road and up the street at the Honey Harbour Public School.

Starting in 2021, the library will have virtual programs available to view on our website and Facebook page.

Our website is undergoing an update and makeover. It will be completed by the spring of 2021.
